

BHS has been specializing in designing, engineering and manufacturing innovative machinery for the corrugated industry since 1961. Consider the knowledge that has been accumulated and the expertise gained from such a long tradition. At BHS headquarters in Germany as well as in the subsidiaries around the globe 1,500 employees provide the customers with unparalleled machine availability, service and support.

The BHS plant in Shanghai was built up in order to offer the best machinery and immediate service to Asian customers. The assembly of the important corrugating machines, the production of new and the regrinding of old corrugating rolls are carried out in China.

Our corporate mandate is to seek out problem areas and to provide our customers with professional solutions. Our best references are from successful BHS customers. It is a testament to the fact that machinery and after sales support from BHS has enabled them to meet their individual market requirements. Our standing as a reliable partner from initial project survey to lifetime service of the machine remains undiminished. By providing our own employees with an intensive, on-going training BHS customers are ensured that their operating crews will receive the highest degree of professional in-plant training possible.

That is our promise ! We provide "More than just technology"
